

Bar & Kitchen Mat

A typical matting application in the food service area is that of a wet area. Most food service matting needs to have drain through capability to allow water, fats, oil, greases and/or caustics to drain away from the mat. End users purchase matting in general purpose, black colour and grease resistant/grease proof, terra cotta varieties.

Application:

Perfect for wet, greases area

Size: 0.9m x 1.5m

Colour: Black

Thickness: 12mm

Weight: 8kg/pc
